

YEARS 1-7

MATHS CLUB

If you love Mathematics and want to practise and improve through teacher mentoring and assistance, this is for you.

The club aims to encourage students to apply their mathematical knowledge and build on their critical thinking skills. It enlightens and exposes them to how mathematical concepts and practices are actually used in real life. The club organises various events such as visits to national technological exhibitions and government or private sector locations where mathematics is applied in the workplace. Students are urged to participate in the many competitions/conferences including: the Regional and Pancyprrian Mathematics Competitions; the Student Relay Competition; the Cyprus Math Olympiad; the Summer Math School and the Euromath Conference.

For more information, please see Ms. Athena Antoniou, Ms. Stella Liopetriti and Mr. Petros Ioannou.
